## **Introduction**

The aim of the present guidelines is to help teachers implement the newly built programme introduced into the 2<sup>nd</sup> AM Classes. They are to serve as an example of what could be done for the implementation of the programme to maximum effect.

These guidelines contain summarized information about the official syllabus and the Competency Based Approach. They will try to make explicit the finalities of the teaching of English as set by the educational authorities of our country as well as the objectives to achieve and the competencies to implement. They will offer a general framework for sequencing a lesson as well as ideas on how to adapt the learner's textbook. They also contain a series of detailed lesson plans related to file one and file five.

## **A- Main Concepts**

### **1. Syllabus / Programme**

A plan of things that will be done or included in the development of something. In our case what is involved is the development of the teaching of English as a second foreign language.

### **2. Development.**

The gradual growth of the teaching of English so that it becomes more and more advanced.

### **3. Finality**

Final goal to achieve at the end of the whole process of the teaching of English as a Second Foreign Language.

### **4. Objective**

Something we are trying to achieve, the purpose of doing something.

### **5. Approach**

A way of dealing with something, a way of doing or thinking about something.

### **7. Competency**

The ability to do something well. A skill, an ability that we need in a particular job for a particular task. The competency is a know how to do. It integrates capacities, skills and knowledge.

## **B- The Syllabus**

### **1. Finalities**

Helping our society to get integrated in modernity. This means participation in a community of people who use English by showing and exchanging ideas and experiences in the fields of science, technology, culture and civilization.

.Developing the spirit of criticism, tolerance and open-mindedness.

.Acquiring competencies that will help the learner live comfortably in his environment. These competencies are interdependent. The non-acquisition of one of them will stop or delay the acquisition of the others. All the competencies must be integrated.

### **2. Objectives**

#### *a- Linguistic objectives:*

The 2<sup>nd</sup> AM learner is supposed to be equipped with a basic amount of language material: grammar, phonetics, vocabulary and the four skills.

The 2<sup>nd</sup> AM syllabus aims at consolidating and developing the 1<sup>st</sup> AM acquisition.

- Grammar: the learners will be trained in discovering the rules of English.
- Phonetics: improving the pronunciation and intonation.
- Vocabulary: increasing the learner's stock of lexical words.
- The four skills: more training in listening, speaking, reading and writing aiming at communication and interaction in a free and creative way.

#### *b- Methodological objectives:*

- Promoting the pupils' learning strategies aiming at autonomy.
- Making the pupils acquire methods for working and thinking.
- Getting pupils acquire strategies of self-evaluation.
  
- Getting pupils to be able to exploit various documents and feel interested in subjects that are not dealt with in class.

**c- Cultural objectives:**

Making the pupil open up his mind through discovering the context of English civilization and culture. Thus, there is a necessity to:

- Identify the pupils' real needs.
- Regard English as a real tool of communication.
- Develop oral communication ( listening and speaking) and written communication (reading and writing )
- Set up situations of real communication.
- Choose topics according to pupils' age and interests.
- Focus on the pupil (pupil-centred teaching).
- Use suitable teaching aids.

## **C. The competency based approach**

### **1. The learner's Entry profile:**

The pupil has completed a whole school year (1<sup>st</sup> AM) in which he has been exposed to:

- Interacting orally in English
- Identifying the phonological system of English.
- Grammar and lexis.
- Interpreting and producing simple oral and written messages.
- Working in groups.

### **2. The learner's Exit profile.**

- Consolidating the pupil's 1st AM acquisition.
- Interacting in real school life situations.
- Express oneself in more elaborated English.
- Carry on studying English at the next school level (3<sup>rd</sup> AM)

### 3. The methodology.

The competency based approach aims at bringing some change to the pupil's role. The pupil takes an active part in the learning process. He is no longer "a bottle to fill in" but he is engaged in all the activities. Every thing in the teaching process is centred on the learner.

Alike the 1<sup>st</sup> AM level, the pupils are asked to develop the three competencies.

- **Competency one:** to interact orally in English.

The pupil interacts in everyday school situations by using verbal and/or non-verbal language. The pupil will be able to situate himself in time and space in order to adapt himself to the others' reactions.

- **Competency two:** to interpret authentic oral or written documents.

The pupil demonstrates his comprehension by oral and/or written reformulation of various types of language material through various supports (songs, films, tales, comics, games, etc ...)

- **Competency three:** to produce simple messages orally and in writing

The pupil is gradually led to produce simple and coherent messages. Activities will be less and less guided.

The three competences are complementary and interdependent. They are articulated around competence one which is the key competence.

### 4. The project work

The project work is an important activity in the Competency Based Approach. It is creative and allows the pupil to face the unknown.

The process of the project work follows a number of stages.

a - **The preparation stage.**

- Define clearly the project (nature, aim )
- Adjust it to the competencies aimed for.
- Consider the theme, the duration, the teacher's role, the grouping of the pupils and the assessment procedure.

**b- *The realization stage***

- The teacher becomes an adviser, a facilitator, a resource person.
- Assist pupils in collecting ideas, planning actions.

**c- *The presentation stage***

- Pupils write the final draft.
- Pupils present their product in front of a large audience (display, exhibition)
- Ask pupils to review their previous actions and discuss them among themselves (pupils' feed back)
- Discuss honestly the pupils' performance (Teacher's feed back)

## **D - The Textbook**

### **1 – The contents**

Spotlight on English book two consists of five files. Each file consists of three sequences, listening script, learn about culture, check, help, your project and self-assessment.

The three sequences learn about culture and your project are the main features for planning and sequencing lessons. As for listening scripts, check and help, they are to be integrated in the different lessons according to the different needs.

Check consists of activities (exercises ) that may be the basis for building the different assignments ( tasks ) the educational authorities have planned for each term ( devoirs et compositions trimestriels ).

Self Assessment is a grid to be used by the pupils for their self evaluation.

#### ***a- The sequence***

Each sequence consists of two main parts:

- Listen and Speak aims at training pupils in listening, picking out information, speaking at a simple level, improving pronunciation and intonation, practising and re-using the new language.

- Discover the language aims at helping pupils discover the rules of the English grammar, vocabulary and spelling and practising them in series of exercises. A summary of these rules is presented in highlighted box to make them easy to remember.

***b- Learn about Culture.***

This section consists of various language material (especially short and simple pieces of writing) to serve as a guided tour to open a window on the culture of the English speaking world.

***c- Your project***

This section aims at training pupils to research work in all sort of subjects as science, history and geography, etc ... The pupils are led to re-use what they have learnt in English in a free and creative way.

**2- Time to devote to each section**

a- Devote three hours to each sequence as follows:

- 1<sup>st</sup> Session (one hour): Listening script + pronunciation and spelling + practice stress and intonation + Practice.
- 2<sup>nd</sup> Session (one hour): Go forward along with a review of the main features practised in the previous lesson and doing the "Practice" activities left.
- 3<sup>rd</sup> Session (one hour): Discover the language (the whole section).

b- Devote one hour to Learn about Culture.

c- Devote three hours to the project work.

- 1<sup>st</sup> session (one hour) : Preparation
  - Define the project with the pupils.
  - Organize the grouping of the pupils.
  - Give specific tasks for specific groups.
- 2<sup>nd</sup> Session (one hour) : Realization
  - Check pupils' material, information, and data.
  - Help the pupils plan further actions, formulate or reformulate objectives

- 3<sup>rd</sup> Session (one hour) : Presentation
- Help pupils write their final draft.
- Discuss the way of presenting the products.
- Feed back (pupils and teacher )

### **3 – Evaluating and Adapting the Textbook**

It is important for teachers to analyze the textbook in use to be sure it supports good teaching practices. The teacher should ask him/herself questions about:

***a - The format:***

- Is there a teacher's book, workbook, answer key, cassettes, etc...?
- Is there a table of contents?
- How are the learning materials organized?

***b- The objectives:***

- What is the learner expected to do? Is the learner going to focus on rules or forms, meaning, relationship between form and meaning? Which kind of mental operations (repetition, formulation, analysis)?
- Who does what with whom (learner to class, learners alone simultaneously, learners in pairs)?
- With what content (input to learners, illustrations, written words, etc...)?
- What is the teacher's role?
- What is the learner's role?
- What do the materials try to accomplish?

After evaluating the materials, there may be a need to adapt some of them in order to better meet the needs of the teacher or the learners.

There are several alternatives and ways:

- Leave things out.
- Add to existing activities.
- Reduce things.
- Rewrite material to make it fit the teaching / learning situation.
- Reorder the material to better fit the situation.

## **E – Planning and Sequencing a lesson**

### **1 – Concepts**

**a- Planning:** Thinking over what to do, what learners are expected to do. Thinking over the language items to use, how to use them. Thinking over materials and aids needed. Considering the learner's abilities, interests, preferences and of course the official programme.

Preparing a lesson plan is of an absolute necessity before teaching.

**b - Sequencing:** Devising a set of activities and arranging them according to a strategy in order to achieve the set objective.

**c - Lesson:** A period of one hour during which things are taught / learnt.

### **2 – Planning a lesson:**

a- Decide what and how to teach before the lesson.

b- What to teach and how: focus on developing communication skills, not finishing the programme or memorizing grammar rules.

c- Set a clear objective for each lesson. The objective should be observable and measurable.

- Observable: That can be seen and noticed.

e.g.: "pupils will learn about ...." is not an observable objective. How can we see / notice that pupils are really learning?

"Pupils will write..." "Pupils will use ..." These two objectives are observable and measurable. We can effectively see that learners are really writing and using what we want them to write and use. We can notice the number of learners that are writing and measure how well (or how bad) they are writing. Observable and measurable objectives use verbs that refer to observable actions (e.g. discuss, describe, summarize, classify etc...)

Objectives have two parts:

- The new information ( structure, vocabulary, skill, topic)
- The communicative uses of the new information (write a dialogue, describe a friend, write a paragraph, etc...)

d- After writing the lesson plan, check that it is well planned and time bound.

### 3 – Sequencing a lesson.

Each lesson (a whole period of one hour) is to be organized around three main stages:

**a - Preparation:** This stage prepares the learner's to receive the new information stated in the set objectives.

- It gives the necessary language skills to understand in the next stage (presentation).
- It checks what learners know about the subject.
- It connects with the pupils' experience and everyday lives.
- It gives learners a preview of the target structure.

**b- Presentation:** The new material is presented to learners who study it with the teacher or independently. What do learners do?

They listen, speak, read or write. When presenting new information, only one thing should be presented at once.

**c- Practice:** Learners practise the new information or skill. They use what is presented and studied in the two previous stages in different ways. The teacher should devise activities for:

- Checking the learners' understanding of the new information.
- A guided use of the new information.
- Applying the new information in a free and creative ways.

The practice activities should connect with the learners' interests and language needs. They should integrate the target skills with other skills.

**d- Sequencing activities within a stage:**

Activities should be organized in the following manner:

- From general to more specific.
- From mechanical to more creative.
- Form familiar to unfamiliar.
- Form receptive to productive.
- Form comprehension to application.
